

A- Z alternate names for palm oil

There are four main names for palm oil that you may find on the back of a label:

- Palm
- Stear
- Laur
- Glyc

These names make up about 60% of global palm oil use; and although these names are frequently used on the back of labels, they might not always refer to palm oil. However; they are the firm foundations that make up the fatty acids that palm oil can be made into.
